Challenges

- Safety of all our patients.
- Respect of strict standards of cleanliness and hygiene.
- Management of a hospital
 - *In practice, it is more complicated than a nuclear power station.*

Many different care units

More than 1 000 visits per day in consultations.

'Securing patient safety through professional cleaning & hygiene solutions in the healthcare sector'

Many different care units

More than 100 interventions per day in the operating theatre.

'Securing patient safety through professional cleaning & hygiene solutions in the healthcare sector'

Many different care units

More than 110 visits per day in the emergency department.

'Securing patient safety through professional cleaning & hygiene solutions in the healthcare sector'

Many different care units

Cleaning and disinfection
of endoscopes.

in the healthcare sector'*

Patient turnover

- It increases every year.
→ *This requires impeccable hygiene control between each patient.*

Thank you !
